

Project Modules required

Students account should be based on the email ids given by the college as this account will get deleted itself after student gets passed out from the college.

Examples of our college mail id:

Shreyaskolharkar2021.it@mmcoe.edu.in

Shreyaskolharkar2020.mech@mmcoe.edu.in

Shreyaskolharkar2019.etc@mmcoe.edu.in

Shreyaskolharkar2021.aids@mmcoe.edu.in

Our required modules:

1. Chatbot for college:

A chatbot that can answer some questions asked by students about college. Questions like where to pay fees, which clubs are present in college department wise and for college too, if possible, assignments or timetables as per college classes, etc.

2. Alumni Connect:

One to one chat with alumni for students. Alumni should be able to sign up and sign in to the website.

3. Placement module:

i) Resume builder:

Student should be able to create resume by entering his/her details in a form.

ii) Resume data extractor:

Also, when student uploads resume in this module, data from resume should get stored in an excel sheet that will be accessible to tpo / teachers.

4. Project Tracker:

A project tracker is a tool that lets students manage or measure the progress of their projects as they execute tasks and use resources.

Reference link for module: <https://www.projectmanager.com/guides/project-tracker>

5. Course Finder and sorter:

Students should be able to find and sort courses they need. For example, if a student wants to do a course for data science, he/she should be able to search the same from various websites at one place. Also, he/she should be able to sort these courses according to their preferences.
